**THE 2008 GLOBAL FINANCIAL CRISIS IN THE CONTEXT OF
CAPITALIST CRISIS AND CAPITALIST CRISIS THEORIES**

ABSTRACT

The crisis that broke out in financial markets in 2008 has caused the world economy to face with significant amounts of losses in a short span of time by taking hold of manufacturing markets. Besides pecuniary losses, dominant economical notion has quaked because of the bankruptcy of large companies in America which in the core of the global economy, and the neoliberal concept has started to be examined. The goal of this thesis is to understand and explain the 2008 Crisis whose effects still last. In this direction, it has been put forth how to approach to the Crisis, and then the triggers and consequences of the Crisis have been evaluated.

KEYWORDS

Crisis, financial system, dominant economical notion, neoliberalism.
