**BAŞLIK:** REFLECTION TO POVERTY OF MONETARY POLICIES APPLIED IN  
TURKEY AFTER 1980

### **ABSTRACT**

As in other developing countries, poverty is regarded as one of the major developmental issues in Turkiye, as well. Especially at the present time that joining EU is one of the main terms on the agenda; social development and poverty, together with current economic crisis and applied policies, are considered as more essential than the development levels of the countries and gaining more importance for the last thirty years. The aim of the study is to examine thoroughly the relationship between poverty and monetary policies, and thus reveal the reasons behind the poverty and the situation of poverty in Turkiye. Later, we gave information, the purposed and instruments of monetary policies are defined, and then the policies applied after 1980 are explained. The effects of these policies on poverty are mentioned in the third chapter. In this study, we used situation analysis for cleraing to relationship between monetary policies and poverty diversifications. And also end, the extent of poverty in relation to the policies is explained and this relationship is discussed.
