TITLE: YOUTH UNEMPLOYMENT ISSUE IN TURKEY AND THE ANALYSIS OF ECONOMIC POLITICS IMPLEMENTED IN STRUGGLING WITH UNEMPLOYMENT

ABSTRACT

Unemployment issue is a global issue which all countries are suffered from similar problems. The touchstone of countries for solving this problem is giving importance to youth unemployment issue and qualification of methods in the process of solving this problem. With the effect of some global financial crisis, it has been lived a gradual process of escalation in youth unemployment rates in Turkey too.

The unemployment issue which have reached not inconsiderable proportions and have embodied economic, social, and political dimensions make everyone from bureaucrats to economists deal with this problem. The aim of this study is to attract attention to the unemployment fact which has turned to be a spiral affecting nations and to present suggestions for solving this problem by determining the reasons and dimensions of unemployment.

In this study, the reflections of youth unemployment problem in Turkey and all efforts for solving this youth unemployment problem have been examined in detail. The youth unemployment issue have been analyzed in Turkey and the World. In addition, the reasons, dimensions and results in Turkey have been deeply analyzed and all employment and economic policies applied so far have been showed with their historical processes. By considering the results of those decisions that have affected the future of the country, it is tried to be suggested the ways for the solution. The study is carried out with the deductive method. The data of the study is brought together and supported by classified tables to create the infrastructure of the study and to support the study.

With a view to preventing the undeniable youth unemployment problem, it is an advantage to take some precautions in order to meet the needs of labour force market up with jobless youth for Turkey who is aiming to become a permanent member of EU.
